

VARSHA C

Data Scientist | Data Analyst

Kochi, Kerala • +91-8590909205 • varshasashidharan@gmail.com • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Ambitious Data Scientist and Analyst with a strong foundation in machine learning, deep learning, and business intelligence — equally at home building predictive models and crafting executive-ready dashboards. Proficient in Python (TensorFlow, Keras, Scikit-learn, Pandas), SQL, and Power BI (DAX, Power Query), with project experience spanning the full analytics lifecycle: raw data collection, exploratory analysis, model development, and visual storytelling. Specialized in computer vision (CNN, OpenCV), natural language processing, and end-to-end ML pipelines, while also delivering KPI dashboards and BI reports that drive business decision-making. Currently advancing AI expertise through a PG Diploma in Artificial Intelligence. Passionate about transforming complex datasets into clear, actionable insights — whether that means training a neural network or designing a dashboard a business stakeholder can act on immediately.

TECHNICAL SKILLS

Machine Learning	Supervised & Unsupervised Learning, Regression, Classification, Clustering, Scikit-learn, Model Evaluation
Deep Learning & AI	ANN, CNN, RNN, Transfer Learning, TensorFlow, Keras, NLP, Computer Vision, OpenCV
Data Analysis & BI	Power BI, DAX, Power Query, Dashboard Development, KPI Tracking, EDA, Statistical Analysis
Programming	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, MySQL, C, C++
Advanced Excel	Pivot Tables, PowerPivot, VLOOKUP/INDEX-MATCH, Forecasting, Conditional Formatting
Tools & Platforms	Jupyter Notebook, Git, GitHub, Linux, Windows

WORK EXPERIENCE & PROJECTS

Fashion-MNIST Image Classification | [Python](#) · [TensorFlow](#) · [Keras](#) · [ANN](#)

- Achieved 92% accuracy on 10-class garment classification using a custom Artificial Neural Network (ANN).
- Executed the complete ML pipeline: image preprocessing, normalization, multi-layer architecture design, training, and hyperparameter tuning.
- Assessed performance using accuracy and loss curves; determined the optimal epoch count to prevent overfitting and improve generalization.

Satellite Image Classification | [Python](#) · [CNN](#) · [TensorFlow](#) · [OpenCV](#)

- Developed a Convolutional Neural Network (CNN) to classify satellite imagery into four land-cover categories: cloudy, desert, green area, and water.
- Performed image preprocessing, resizing, normalization, and label encoding; validated results using a confusion matrix and test-image visualization.
- Demonstrated proficiency in CNN architecture design, feature extraction, and real-world computer vision problem-solving.

Tech Job Market & Skill Demand Analysis | [Power BI](#) · [Excel](#) · [DAX](#) · [Power Query](#)

- Created a multi-page Power BI reporting solution to evaluate technology hiring trends and workforce skill demand across industries.
- Applied Power Query and DAX for data transformation, calculated columns, and dynamic KPI measures with drill-through capability.

- Produced 10+ interactive visualizations including slicers and trend charts, enabling identification of top in-demand skills and fastest-growing job categories.

Adventure Works Sales Analytics Dashboard | *Power BI · DAX · Data Modeling*

- Developed a comprehensive sales analytics dashboard to track revenue, profit margins, customer behavior, and product performance.
- Implemented star-schema data models, time-intelligence KPIs, and dynamic slicers enabling drill-through regional exploration without technical assistance.
- Delivered a single source of truth for sales performance reviews, eliminating reliance on manual reporting processes.

KSEB Meter Reader – Data Management System | *Python · MySQL · HTML · CSS*

- Engineered a web-based system to automate electricity meter reading submission and processing for over 1,000 user records.
- Structured MySQL database schemas with validation rules, consumption-tracking reports, and automated billing notification workflows.
- Reduced processing errors and improved operational efficiency across meter reading and billing operations by replacing manual workflows.

EDUCATION

PG Diploma in Artificial Intelligence

Jul 2025 – Present

Edure Software Institution, Kochi | Machine Learning, Deep Learning (ANN/CNN/RNN), NLP, Computer Vision, Python for AI

Bachelor of Computer Applications (BCA)

Aug 2022 – Mar 2025

Kannur University | Programming, Database Management, Data Structures, Software Development

CERTIFICATIONS

- Tata – GenAI Powered Data Analytics Job Simulation, Forage (Completed 2024)

CORE COMPETENCIES

End-to-End ML Pipelines • Predictive Modeling • Computer Vision • Natural Language Processing • Dashboard Development • KPI Design & Tracking • Feature Engineering • Business Intelligence Reporting • Statistical Analysis • Data Storytelling • SQL Query Optimization • Cross-functional Collaboration
